**DETAILED ACTION**

***Allowable Subject Matter***

1. The Examiner acknowledges Applicant's submission of the after-final amendment, filed on 02/02/05.
2. The allowed claims are 1-27.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the recitations of the specific features of the brace and method, of claims 1, 9, 10, 14, 17 and 22, including especially the following:

The primary reason for the allowance of independent claim 1, is the inclusion of the proximal section of the outer shell extending in a direction transverse to the longitudinal direction at least from the outside portion of the wearer's wrist to approximately a midpoint of the wrist, and the distal section of the outer shell extends in the transverse direction at least from the outside portion of the wearer's hand over the fourth metacarpal.

The primary reason for the allowance of independent claim 9, is the inclusion of the outer shell being conformed to the contours of the wearer's wrist and hand by heat-treating the outer shell after the brace is applied to the wearer, claimed in combination with the brace's inner shell, proximal section, distal section, angle, and straps.

The primary reason for the allowance of independent claim 10, is the inclusion of the outer shell of the brace being adapted to be trimmed to conform to a wearer's hand and wrist, claimed in combination with the brace's inner shell, proximal section, distal section, angle, and straps.

The primary reason for the allowance of independent claim 14, is the inclusion of trimming the outer shell of the brace to conform the brace to a wearer's hand and wrist, claimed in combination with the inner shell, proximal section, distal section, angle, and straps.

The primary reason for the allowance of independent claim 17, is the inclusion of the proximal section of the outer shell extending in a direction transverse to the longitudinal direction at least from the outside portion of the wearer's wrist to approximately a midpoint of the wrist, and the distal section of the outer shell extends in the transverse direction at least from the outside portion of the wearer's hand over the fourth metacarpal.

The primary reason for the allowance of independent claim 22, is the inclusion of heat-treating the outer shell to conform the outer shell to the contours of the wearer's wrist and hand, claimed in combination with the inner shell, proximal section, distal section, angle, and straps.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
